

## *Safe Solutions For Health Care Waste Management*

*The SorbTech family of health care products are engineered to provide the medical community with user-friendly, safe solutions for medical waste management.*

### **OMNI-KAP™**

OMNI-KAP™ medical waste disposal powder is a safe and effective method used to neutralize and solidify solid or liquid hazardous medical waste. The OMNI-KAP Solidification Kit includes everything you need to manage your medical waste based on patented OMNI solidification technology combined with over ten years of practical field applications and experience.

To reduce the risk of removing and transporting collected medical waste, OMNI-KAP was specifically engineered to eliminate the risk of hazardous aerosolization and splashing of waste fluids while neutralizing solid waste.

### **BIOSET™**

BioSet™ is a proprietary powder that cementatiously solidifies body fluids such as blood serum and vomitus. Now you can solidify and neutralize biohazards and infectious wastes in one simple step. Cleanup is fast and easy with the BioSet spill kit and the resulting waste material is safe for disposal.

Medical professionals who come in contact with human blood and bodily waste fluids can be exposed to potentially infectious hazards. BioSet is a safe and effective method for solidifying hazardous biohazardous fluids.

### **FORMASET™**

FormaSet™ is a proprietary granular used for vapor control and waste management of spilled aldehydes including formaldehyde, gluteraldehyde and formalin.

Safe and effective, FormaSet neutralizes and absorbs hazardous aldehyde spills by first suppressing vaporization followed by the aldehyde changing into a polymeric compound for safe and easy clean up. The FormaSet spill kit contains all of the basic personal safety wear and clean-up equipment for quick response and ease of use.

# SAFE SOLUTIONS FOR HEALTH CARE WASTE MANAGEMENT

## MERCURY MAGNET™

Mercury Magnet™ powder is the ideal solution for the decontamination and clean up of accidental mercury spills. Engineered for a quick response and environmental friendly, the Mercury Magnet spill kit contains all of the necessary clean up and personal safety gear you'll need to treat and properly recycle the mercury spill.

## CHEMOSET™

ChemoSet™ is a dry powder absorbent/solidifier that cementatiously solidifies chemicals such as those found in chemotherapy drugs. No special tools or equipment are required. The ChemoSet kit contains everything you need for a quick clean-up resulting in waste material that is safe for immediate disposal.

The convenient ChemoSet chemotherapy spill kit is designed for a quick response to an accidental spill at home or in the hospital while administering chemotherapy treatment to patients. Ideal for doctors, nurses and oncology practitioners.
